

October 28, 2021,

Public Health Sudbury & Districts works with Public Health Ontario to follow-up with close contacts of COVID-19 cases. Public Health Ontario does not customize direction based on local investigations. Local direction is based on individual circumstance and risk assessment, after detailed follow up and is based on a number of factors (such as vaccination status, breakthrough cases, and Variants of Concern). If you receive conflicting information on your isolation, please follow the directions in this letter.

Dear Parent/Guardian, Student, Staff: **Flag Football game (Grade 9-12)**

An individual who attended **Flag Football game at James Jerome Field on October 25** has tested positive for COVID-19 and your child/student/staff has been identified as a potential close contact.

Someone is considered a close contact if there is a chance that they had a high-risk exposure to someone who tested positive for COVID-19.

Public Health Sudbury & Districts has investigated and determined that the last date of high-risk exposure was **October 25, 2021**.

If the child/student/staff has or develops any of the following symptoms, they should get tested as soon as possible.

- Fever and/or chills (temperature of 37.8 degrees Celsius/ 100 degrees Fahrenheit)
- Cough or barking cough (croup)
- Shortness of breath
- Decrease or loss of taste or smell
- Nausea, vomiting and/or diarrhea
- Fatigue
- Muscle aches and pain
- Sore throat
- Runny or stuffy nose
- Abdominal pain
- Headache
- Conjunctivitis (pink eye)
- Decreased or lack of appetite

Based on this investigation, Public Health has concluded that direction will be based on an individual's immunization status. If the isolation period changes or is extended, you will be notified by letter.

Please carefully review the following direction for those who are **fully immunized** (or previously positive) and the direction for those who are **NOT fully immunized** (or immunization status unknown or not previously positive). Please follow the scenario applicable to your situation.

Fully immunized (or previously positive): Public Health direction

If the child/staff is not immunocompromised and has been **fully immunized** for COVID-19 or was a **confirmed positive** case within the last 90 days, this section applies to them.

An individual is **fully immunized** if at least 14 days prior to their high-risk exposure they have received:

- the full series of a COVID-19 vaccine authorized by Health Canada, or any combination of such vaccines; OR
- one or two doses of a COVID-19 vaccine not authorized by Health Canada, followed by one dose of a COVID-19 mRNA vaccine authorized by Health Canada; OR
- three doses of a COVID-19 vaccine not authorized by Health Canada.

An individual is considered **previously positive** if they tested positive for COVID-19 in the last 90 days and have since been cleared from their infection.

Public Health direction:

	Has any symptoms of COVID-19 (listed above)	Does not have symptoms of COVID-19 (asymptomatic)
When should the child/staff get tested?	Test immediately. COVID-19 assessment centres are listed below. If they test negative, a repeat test is recommended on or after day 7 from the last date of high-risk exposure (listed above).	Testing is recommended as soon as possible. COVID-19 assessment centres are listed below. If the individual tests negative, a repeat test is recommended on or after 7 days from the last date of high-risk exposure (listed above).
Does the child/staff need to isolate?	They are required to isolate while awaiting their test results. If a negative result, they can stop isolating, but should continue to stay home until they have no fever and symptoms have been improving for at least 24 hours, or 48 hours for gastrointestinal symptoms (for example: vomiting, diarrhea). If they test positive , Public Health will contact you to provide additional information.	They are not required to isolate while waiting for their test results. If they test positive , they must isolate for 10 days from the date that the test was done/sample collected. Public Health will contact you to provide additional information.
Do household	Household members who are fully immunized or previously positive	Household members are not required to self-isolate, regardless of

members need to self-isolate?	<p>within the past 90 days are not required to self-isolate unless they develop symptoms.</p> <p>Household members who are not fully immunized and not previously positive within the past 90 days:</p> <ul style="list-style-type: none"> • Must isolate while the child is awaiting their test results. • Must isolate if the child tests positive. • Can stop isolating if the child tests negative. 	the household member's immunization or previously positive status unless the household member develops symptoms.
When can the child/staff return to school/work?	<p>If they test positive, Public Health will contact you to provide additional information on return to work/school</p> <p>If they test negative, they can return once they have no fever and symptoms have been improving for at least 24 hours, or 48 hours for gastrointestinal symptoms (for example: vomiting, diarrhea).</p>	<p>Immediately, unless otherwise directed by Public Health.</p> <p>Contact your school/work to find out when in-person instruction will resume for this class/cohort, if applicable.</p>

NOT fully immunized (or immunization status unknown or not previously positive):
Public Health direction

If the child/staff is immunocompromised or has **NOT been fully immunized** or was **not a previously positive** case within the last 90 days, this section applies to them.

An individual is **not fully immunized** if at least 14 days prior to their high-risk exposure they have **not** received:

- the full series of a COVID-19 vaccine authorized by Health Canada, or any combination of such vaccines; OR
- one or two doses of a COVID-19 vaccine not authorized by Health Canada, followed by one dose of a COVID-19 mRNA vaccine authorized by Health Canada; OR
- three doses of a COVID-19 vaccine not authorized by Health Canada.

An individual is **not previously positive** in the last 90 days if they have not tested positive for COVID-19 in the last 90 days and been cleared of their infection.

Public Health direction:

	Has symptoms of COVID-19 (listed above)	Does not have symptoms of COVID-19 (asymptomatic)
When should the child/staff get tested?	Test immediately. COVID-19 assessment centers are listed below.	Seek testing on or after 7 days from the date of high-risk exposure (listed above)

Does the child/staff need to isolate?	<p>They are required to self-isolate at home immediately while awaiting their test results.</p> <p>If they test positive, Public Health will contact you to provide additional information.</p> <p>If they test negative and remains asymptomatic, they must continue to isolate up to and including November 4, 2021.</p>

For anyone who is required to self-isolate, Public Health Ontario's resource [How To Care for a Child Who Needs to Self Isolate](#) provides more information.

If you are concerned about new or worsening symptoms of COVID-19, contact Telehealth Ontario at 1-866-797-0000, or your health care provider.

Call 911 or take your child to the nearest hospital immediately if your child is experiencing any of the following symptoms:

- Severe difficulty breathing (struggling for each breath, can only speak in single words)
- Severe chest pain (constant tightness or crushing sensation)
- Feeling confused or unsure of where they are
- Losing consciousness

COVID-19 testing is offered at the following locations. Appointments are required.

Health Sciences North Assessment Centre

- 705.671.7373 between the hours of 9 a.m. and 5 p.m., 7 days per week
- Online form: [Request an Appointment at the COVID-19 Assessment Centre \(hsnsudbury.ca\)](https://hsnsudbury.ca)

Manitoulin Health Centre Assessment Centre

- Mindemoya 705.377.5311, between the hours of 9 a.m. and 5 p.m., 7 days per week.
- Little Current 705.368.2300, between the hours of 9 a.m. and 5 p.m., 7 days per week.

Noojmowin Teg Health Centre

- 705.368.2182 between the hours of 8:30am and 4:00pm, Monday to Friday

Espanola and area communities assessment centre (for clients in Nairn, McKerrow, Massey, Sagamok, Webwood, Espanola, and Birch Island)

- 705.869.1420, ext. 4500, between 8 a.m. and 4 p.m., 7 days per week.

Chapleau Assessment Centre

- 705.864.2568 between the hours of 9 a.m. to 5 p.m., Monday to Friday.
